San Francisco State University	June 2025
Bachelor of Science, Major in Computer Science, Minor in Mathematics	GPA: 3.50/4.00
South Seattle College	January 2021
Associate in Science	GPA: 3.50/4.00

EXPERIENCE

Cashier
Walmart, [Seattle, Washington]
Part-Time | [October, 2021] – [November, 2022]

- Processed cash, credit, and mobile payments accurately for high-volume customer transactions.
- Maintained clean and organized checkout area in line with store appearance standards.
- Assisted customers with locating items, applying discounts, and handling returns or price checks.
- Demonstrated strong attention to detail by verifying prices and monitoring for loss prevention.
- Supported front-end team with stocking, bagging, and customer service during peak hours.

Cashier
Target, [San Francisco, California]
Part-Time | [April, 2023] – [October, 2024]

- Delivered fast and friendly checkout experiences while maintaining efficiency and accuracy.
- Used POS system to handle purchases, apply promotions, and resolve payment issues.
- Provided exceptional guest service by answering product questions and assisting with store navigation.
- Collaborated with team members to uphold store cleanliness and meet daily sales goals.
- Maintained a positive and professional attitude in a fast-paced retail environment.

TECHNICAL SKILLS

-
- Programming Language: Python, Java, JavaScript, C, C++, CSS, HTML, TypeScript
 - Operating Systems: Windows, Unix, Linux
 - Software/Libraries: Eclipse, JavaFX, Visual Studio Code, Git
-

PROJECTS

Music Player

HTML, CSS, JavaScript

- Created a web-based music player application that offers interactive features such as play, pause, next, previous, playlist management, and shuffle options for an engaging user experience. Integrated audio controls, including a volume slider, for adjustable audio.

Quiz/Study App

PHP, HTML, CSS

- Designed and implemented a dynamic quiz/study application as a valuable language learning tool. Craft a user-friendly interface, featuring a question-and-answer form for interactive quizzes and exercises.

Marketplace Website

HTML, CSS, JavaScript, TypeScript

- Collaborated in a 6-person team, simulating a startup environment. Designed and developed a full-stack web application exclusively for SFSU students to securely buy, sell, and trade items through a campus-focused online marketplace. Implemented key features including user authentication, item listing with media upload, search and filter functionality, and direct contact between buyers and sellers. Built a responsive front-end interface and integrated a MySQL database on the back-end to handle user data, listings, and transactions. Delivered the application on time with SFSU-specific student design and functionality, optimized for cross-browser and mobile access.

QUALIFICATIONS

- Proficient in PC applications, including Microsoft Word, Excel, PowerPoint, internet usage, and email communication.
- Demonstrates dependability, responsibility, and strong organizational skills. Committed and cooperative team player.
- Enthusiastic and dedicated to hard work, self-motivated, and maintains a positive attitude. Punctuality is a priority.
- Bilingual: English and Vietnamese.
- Honor List in South Seattle College and Dean's List in San Francisco State University.
